Education

Ontario Tech University, Oshawa *(Sept 2022-Present)*

- Bachelor of Science (Hons), Computer Science - Digital Media
- President's list (2023)

Courses: Data Structures and Algorithms, Computer Architecture, Scientific Data Analysis, Software Design and Analysis, Computational Science, Software Systems Development and Integration, Digital Media, Computer Graphics & Visualization, Web Development

Experience

Cheffery

UI/UX Designer - *(June 2024-Present)*

- Redesigning the company website using Figma, focusing on creating a visually appealing and user-friendly experience
- Gather inspiration and incorporate innovative design elements into the new layout
- Strived to achieve an optimal balance between a professional appearance and a fun, engaging user interface
- Created interactive Figma prototypes to demonstrate user flows and layout transitions
- Applied Jobs To Be Done methodology to align design decisions with user motivations and desired outcomes
- Developed branded digital experiences and campaign assets across landing pages, mobile-first designs, and interactive flows
- Incorporated WCAG accessibility standards into design decisions to ensure an inclusive experience for all users
- Designed standalone landing pages and service-specific sections to promote client offerings in SEO and social media

Freelance

UI/UX Designer and Web Designer (Aug 2024 - Present)

- Designing a custom website based on the client's vision, which is then handed off to a partner for implementation
- Collaborating closely with clients to understand their goals, brand identity, and target audience
- Conducting research and utilizing online tools to enhance design elements, ensuring an intuitive user experience and visually appealing interface
- Iterating on feedback to refine the design, ensuring it aligns with industry best practices and client expectations
- Developed and deployed responsive web pages using HTML/CSS and React

Academic Oasis

Chief Marketing and Design Officer - (May 2024- January 2025)

- Led the design and branding strategy for Academic Oasis, a cross-platform desktop and mobile application
- Applied Service Design principles to ensure a consistent and seamless experience across the entire user journey, from onboarding to continued engagement
- Constantly evolving the UI to deliver a seamless, user-centric experience, adapting to user preferences and continuously enhancing functionality
- Continuously improved product quality, driving higher user satisfaction
- Managed a team of 3 content creators, overseeing social media content production for Academic Oasis, which led to increased online engagement and brand visibility

UI/UX Designer - (March 2024-May 2024)

- Designed multiple UI themes, boosting visual consistency and enhancing user engagement across platforms
- Designed and iterated high-fidelity UI components in Figma, ensuring alignment with visual identity and project goals
- Adapted to design feedback, iterating on concepts to continuously improve product quality and boost user satisfaction

Projects

Academic Oasis:

A centralized platform designed to simplify student involvement and streamline club management

- Designed a centralized platform that streamlines club discovery, engagement, and executive management
- Enabled club executives to efficiently manage essential data such as budgets, attendance, and event planning
- Aimed to improve student engagement and organizational efficiency by providing a unified space for all club-related tasks

FitCheck:

A social platform for sharing outfits, gathering feedback, and discovering style inspiration

- Designed with a social media aesthetic to let users post outfits and receive real-time feedback from peers
- Encourages fashion expression and community engagement through likes, comments, and outfit ratings
- Allows users to browse outfit ideas, follow others' styles, and stay inspired by trending looks

Cheffery:

A website redesign for a premium catering company to attract high-end clientele through a polished digital presence

- Created a visually refined and professional online experience to reflect the brand's upscale identity
- Designed a responsive website to help the company attract and convert clients through elegant UI and clear service offerings
- Tailored the layout and branding to appeal to the company's niche, high-end market
