SUMMARY

UI/UX designer with a Computer Science foundation, specializing in creating accessible, user-centered digital products. Skilled in Figma, React, and usability testing, with experience delivering inclusive designs through research, prototyping, and cross-functional collaboration.

EDUCATION

Ontario Tech University

Oshawa, ON

B.Sc. (Hons) Computer Science — Digital Media

Sept 2022 – Present

- Relevant Coursework: HCI, Web Dev, Mobile App Dev, Data Structures, Computer Graphics

EXPERIENCE

Cheffery

Jun 2024 – Present

UI/UX Designer

Remote

- Redesigned catering website in Figma with interactive prototypes and streamlined flows.
- Applied Jobs-To-Be-Done; integrated usability findings into design iterations.
- Guided cross-functional teams on accessibility and inclusivity (WCAG 2.1).
- Collaborated with developers to implement responsive pages, ensuring consistency across desktop and mobile.

Freelance

Aug 2024 – Present

UI/UX & Web Designer

Remote

- Built responsive websites in React/HTML/CSS aligned with client branding.
- Conducted user interviews, surveys, and usability tests; iterated designs for clarity.
- Delivered multiple custom sites with positive client feedback on usability.
- Created lightweight design systems for clients to streamline future updates.

Academic Oasis

May 2024 – Jan 2025

Chief Marketing & Design Officer

Remote

- Led cross-platform branding; produced high-fidelity UI components in Figma.
- Applied Service Design across onboarding and engagement workflows.
- Managed and mentored 3 content creators, delivering consistent design output.
- Launched new marketing assets that increased student engagement with the platform.

PROJECTS

Academic Oasis — Club Management Platform

- Built a centralized web platform for club discovery, event management, and workflows.
- Designed responsive UI in Figma; collaborated on React implementation.

FitCheck — Social Outfit Feedback App

- Prototyped a social app where users post outfits and receive peer feedback.
- Developed a design system in Figma; emphasized engagement features (likes, comments).

CJS Performance — Client Website

- Portfolio website to establish an online presence and attract clientele.
- Display of past experiences and services they provide.
